

UNIVERSITÄT
BAYREUTH

FAMILIE IN DER
HOCHSCHULE

The University of Bayreuth is a research-oriented university with internationally competitive, interdisciplinary focus areas in research and teaching. The University of Bayreuth's Faculty of Life Sciences: Food, Nutrition and Health is currently seeking to appoint a

Full Professor of Public Health Nutrition

at salary grade W3. This is a permanent civil service position.

We are seeking a scholar with research experience in the field of public health with a focus on nutrition (and physical activity). Applicants are expected to represent the fields of prevention, health promotion and their importance in the structures of public health in both research and teaching. They should incorporate health, humanities, and social science influences. One focus of their research interests should be on individual as well as societal risk and protective factors, such as lifestyle, social status and life context, health promotion, as well as prevention of relevant – especially nutrition-related – diseases from an epidemiological perspective. The transfer of basic and health care research to social practice and the organization of the health care system must also be considered. The required expertise in quantitative and qualitative research methods must be demonstrated by way of appropriate practical experience and qualifications, such as in public health, health management, or a related social science field.

Active participation in the Faculty of Life Sciences: Food, Nutrition and Health is expected. In addition to academic self-governance, this also includes the establishment and design of new degree programmes that fit optimally into the existing spectrum of current degree programmes. Teaching duties (nine semester hours) will be in all degree programmes currently taught. Participation is also expected in other new degree programmes to be designed. A university lecturer should be recruited who, due to his / her research orientation, can contribute to the networking of the individual disciplines of the faculty and participate in inter- and transdisciplinary research projects. In addition, there are opportunities to cooperate with other fields covered by the University of Bayreuth, such as sport science, medical management, African studies, and health economics.

The ability to teach in German and English is expected. International applicants should be able to teach in German in the medium term.

The general administrative requirements for hiring professors at universities in Bavaria apply. A complete description of the vacancy can be found at www.uni-bayreuth.de.

Applications (CV, outlining education and academic career, list of publications, list of courses taught, experience obtaining external funding, as well as copies of all diplomas and certificates) are to be submitted electronically to Prof. Dr. Janin Henkel-Oberländer, the Dean of the Faculty of Life Sciences: Food, Nutrition and Health, via <https://uni-bayreuth.berufungsportal.de> by **30 September 2023**. Applicants are welcome to direct questions and requests for further information to the Dean at dekanat.leg@uni-bayreuth.de. Application documents will be deleted in accordance with data protection law following the conclusion of the appointment process.
